

Clairvoyant Training 1

photo: charlotte rosshandler

With TRISHA POPE

October/November 2013

Let yourself be guided in practical, down to earth techniques which help to develop your clairvoyant skills. This training technique developed by the Berkeley Psychic Institute and other affiliated schools prepare students with step-by step, concrete and simple techniques that contribute to demystify the phenomenon. Students will gain experience with a meditation technique that helps with separations with others and holding seniority in one's own space. There is metaphor interpretation, third eye clearing, reading exercises related to health, work, relationship and past lifetimes. In the completion of the 27 hour course, students have enough information to practice clairvoyant reading and will receive a 40 minute personal session with the teacher to help integrate the information.

This training is highly recommended for individuals who are highly sensitive to the emotions and thoughts of others. It provides a framework for strengthening, grounding and validating our intuitive natures. It is valuable for anyone; in any career or life situation.
